**oscFile**  
Document Imaging System

oscFile gets your documents scanned, indexed and stored! **Inexpensively.**

### oscFile is now shipping!

Office Systems Consultants proudly announces the immediate availability of oscFile—the most affordable, fully featured document capture solution available.

oscFile Document Imaging System is highly scalable, and fits into a major agency or a small office. It supports a Distributed Scanning Solution, allowing you to scan where the documents are, and file where they will be needed in the future - over your network - safely, securely, and perhaps most importantly, *inexpensively!*

oscFile provides easy 1-step scanning, unattended processing, centralized control and administration, and supports direct scanning into image files or databases. oscFile can use files from virtually any scanner with TWAIN or ISIS drivers.

oscFile is now installed and operational in the Finance & Accounting offices of Florida Department of Health, and Department of Transportation (Deland), where it is being used for [automatic indexing of Voucher Files using pre-printed barcoded coversheets](#) printed using SmartServer software from e-Form in Tallahassee.
